River of Gold

Setup

1. Place 1 random Region Scoring Tile on each of the 6 Influence Tracks, on the side for the player count.
2. Display 3 Mastery Cards on the side for the player count.
3. Shuffle the Customer Cards into a faceup deck.
4. Randomly place the Imperial Market Tiles on the 3 Imperial Market spaces.
5. **2/3 PLAYERS:** Place 1 random Starting Building Tile on each Shore space marked with the player count.
6. Shuffle the Building Tiles into Era 1 and Era 2 stacks. Place the correct number of Tiles for the player count facedown on the corresponding Era 1 and Era 2 spaces of the Building Board.

   2 PLAYERS: 16 Era 1 | 13 Era 2 - **3 PLAYERS:** 14 Era 1 | 11 Era 2
   4 PLAYERS: 12 Era 1 | 9 Era 2

7. Draw 4 Era 1 Building Tiles and display them faceup in the Building Row.
8. Randomly determine the first player. Play continues clockwise from them. Each player takes a number of Koku based on this order:

   1st: 7 | **2nd:** 8 | **3rd:** 9 | **4th:** 10

9. Each player chooses a colour and takes:

   1 Clan Board
   1 Player Aid Card
   2 Standard Ships - place on the top and middle starting spaces.
   1 Royal Ship
   22 Clan Markers - place 1 at the start of the 6 Region Influence Tracks.
   1 Silk - place on your Clan Board.
   1 Rice - place on your Clan Board.
   1 Porcelain - place on your Clan Board.
   2 Customer Cards - keep hidden.
   1 Score Marker - place on '**0**' on the Score Track.
   1 Moon Marker - place between '**3**' and '**4**' on your Divine Favour Track.
   1 Sun Marker - place on '**2**' on your Divine Favour Track.
   1 Die

10. For both Ships: roll your die, then move that Ship that many spaces.
11. **OPTIONAL:** Randomly display 1 Patron Card from each of the 4 Clans faceup. In reverse turn order, each player chooses 1 available Patron and takes its Card, and any additional components as indicated.
12. Each player rolls their die ready for their first Turn.

As with all completed Customers, each Artisan scores their **FINAL SCORING** bonus separately.

If you deliver to multiple Nobles, your Royal Ship gains all of their abilities.

Each Elder doubles your **FINAL SCORING** VP awarded by the Influence Track in its Region.

If you deliver to multiple Merchants, activate all their abilities when you **Complete your Journey**.

Monks allow you to place a 2nd Marker on a Building when fulfilled; meaning a Building could have 2 owners. Or, if it is your own Building, it will yield you double rewards. Do not gain Influence when placing this 2nd Marker. No Building can have more than 2 Markers in this way.

Game Play

Players take Turns clockwise. Each Turn consists of the following 4 steps.

- You can never have more than 25 Koku, or 6 of any 1 Trade Good.
- You can only perform an Action if you can complete it in full.
- When the last Era 1 Tile is moved to the Building row, the **Emperor's Visit** triggers at the end of that player's Turn.
  EMPEROR'S VISIT: All players gain the owner rewards for all Buildings they own, shown on the flat end of their Building Tiles.
- When the last Era 2 Tile is moved to the Building row, the start of **END GAME** triggers at the end of that player's Turn.

1) Spend Divine Favour (*optional*)

You may spend any amount of Divine Favour to adjust your die by plus/minus 1 per favour spent. A 6 can become a 1, and visa versa.
Your Sun Marker shows your current amount of Divine Favour, and your Moon Marker shows the maximum you can have.

2) Take 1 Action

Take 1 of the 3 Main Actions.

ANYTIME ACTIONS
You can perform the following trades at any point, any number of times:

- Exchange 2 of the same Trade Good for 1 of any other Trade Good.
- Exchange 5 Koku for 1 Divine Favour.

ACTION 1: BUILD 1 BUILDING

1. Choose an empty Shore space in a Region matching your die.
2. Pay the Koku cost indicated on the Shore space.
3. Move 1 Building Tile from the Building row to the chosen space.

   Gain 1 Divine Favour if you take the end Tile of the row.
4. Place 1 Clan Marker on the Building, then gain the indicated amount of Influence in that Region by advancing your Marker on its Influence Track, gaining any rewards you pass.

- Multiple players' Markers can be on the same Influence Track space.
- Once you reach the end of the Track, any additional Influence is lost.

5. Slide the remaining Building Tiles down and refill the empty space.

ACTION 2: SAIL 1 SHIP

1. Choose 1 of your Ships and move it downstream a number of spaces equal to your die's value. Moving from the last space of the River carries you back onto the first space of the River, when this happens it is called "**Completing your Journey**".
2. Collect the Visitor rewards shown on the pointed ends of the Building Tiles in each of the 4 Shore spaces adjacent to the river space where you end your movement; empty spaces grant 1 Koku.
3. The owners of any Buildings in the 4 adjacent Shore spaces (*including you*) collect their Owner rewards, shown on the flat ends of those Building Tiles.

VISITOR REWARD **OWNER REWARD**

Any Influence gained is always in the Building's Region.

COMPLETING YOUR JOURNEY

1. Gain 3 Koku or 1 of any Trade Good.
2. Activate the effects of any of your Merchants with completed orders.
3. Discard the Building Tile at the end of the Building row.
4. Slide the remaining Building Tiles down, and refill the empty space in the row.

- Ships cannot move upstream.
- Ships may not pass through another Ship.

ACTION 3: DELIVER TO 1 CUSTOMER

1. Choose 1 Customer Card from your hand whose Region matches your die.
2. Discard Trade Goods equal to that Customer's Order Request on the top of their Card.
3. Place the Customer Card faceup in your play area. Immediately gain the delivery reward, then any ongoing ability it may have will be in effect. Its end game ability (*if any*) will score in **FINAL SCORING**.
4. Draw 2 new Customer Cards, then discard 1 from your hand faceup.

3) Claim Mastery (*optional*)

You may claim any number of Mastery Goals you meet or exceed. To claim one, place 1 Clan Marker on the highest unclaimed reward on the Mastery Card, and immediately score the VP. You can claim each Mastery Card only once per game.

4) Roll Die

Roll your die ready for your next Turn.

End Game

When the last Building Tile from Era 2 is placed:

1. The current player scores 5 VP.
2. Each other player takes 1 final Turn.
3. Then proceed to **FINAL SCORING**.

FINAL SCORING

1. Award the VP shown on each Region's Scoring Tile to the players in 1st, 2nd (*and in some Regions, 3rd*) positions on that Region's Influence Track; players with no Influence there score no VP. Ties combine the tied positions' VP and split it evenly, rounded down.

   5 **2 PLAYERS:** 2nd-place VP is awarded only if the 2nd-place player is within 5 spaces of the 1st-place player on that Influence Track.
2. Each player scores VP for the number of Customers they've delivered to:

1	2	3	4	5	6+
2	5	9	14	20	27

3. Score endgame VP from any applicable, completed Customer Cards.

The player with the most VP is the winner.
Ties are broken by most leftover divine Favour.
